

40434 HIGH SECURITY SHREDDER

NSA/CSS SPECIFICATION 02-01

40434

- 10 1/4" Feed Opening
- Up to 12 Sheets*
- 1mm x 4.7mm Shred Size - Level 6
- Automatic EvenFlow Lubricator
- SmartPower Management
- Made in Germany

In order to protect our National Security, military and government agencies require higher levels of security from their paper shredders. This Dahle High Security Shredder is NSA approved for NSA/CSS Specification 02-01 capable of reducing a sheet of paper into over 15,500 tiny particles. These particles are so small that they have been rendered impossible to reassemble. In a world of uncertainty one thing is for certain, whatever you put through this shredder, we guarantee will never be read again.

With the widespread use of network printers and fax machines, Top Secret, sensitive information is constantly being printed throughout the workday. It's important to have a powerful shredder located nearby to easily dispose of this information.

The Dahle 40434 uses the latest technology to offer full electronic capabilities including such safety features as Automatic Shutoff when the cabinet door opens and Auto Reverse to prevent an overfeed. Automatic On/Off and Bag Full

Auto Off are features that offer both convenience and satisfaction in knowing you will be notified when it's time to change the bag. Equipped with a built in EvenFlow Lubricator automatic oiling system. This system provides slow, continuous lubrication across the entire cutting mechanism and ensures peak shredder performance.

Those interested in conserving energy as well as reducing electrical costs will enjoy the revolutionary SmartPower Energy Management System. This multi-stage system reduces power consumption after ten minutes of sitting idle (sleep mode), and completely powers down after an additional 20 minutes of inactivity.

As the U.S. continues to face security threats on a global level, Dahle will continue to offer solutions without compromise to operation or dependability.

Built in EvenFlow Lubrication System evenly lubricates the cutting cylinders reducing the risk of a paper jam.

The easy-to-use command dial controls all of the shredder's functions such as power up, reverse, and continuous run.
