

40534 HIGH SECURITY SHREDDER

DAHLE PROFESSIONAL SERIES

In order to protect our National Security, military and government agencies require higher levels of security from their paper shredders. The Dahle 40534 is a Security Level 6 machine capable of reducing a single sheet of paper into over 15,500 tiny particles. This machine is designed for military, federal, state or local governments as well as Department of Defense contractors engaged in projects where National Security is an issue.

Known for its power and waste capacity, this Dahle High Security Shredder provides a practical solution for accommodating the shredding needs of even the busiest offices. Its attractive design and large waste bin make this a nice addition to any large office, copy room or communications center.

The Dahle 40534 uses the latest technology to offer full electronic capabilities including such safety features as Automatic Shutoff when the cabinet door opens and Auto Reverse to prevent an overfeed. Automatic On/Off and Bag Full Auto Off are features that offer both convenience and satisfaction in knowing you will be notified when it's time to change the bag. This

shredder comes complete with a built in Even-Flow Lubricator automatic oiling system. This system provides slow, continuous lubrication across the entire cutting mechanism and ensures peak shredder performance.

Those interested in conserving energy as well as reducing electrical costs will enjoy the revolutionary SmartPower Energy Management System. This multi-stage system reduces power consumption after ten minutes of sitting idle (sleep mode), and completely powers down after an additional 20 minutes of inactivity.

As the U.S. continues to face security threats on a global level, Dahle will continue to offer solutions without compromise to operation or dependability.

40534

12" Feed Opening

Up to 12 Sheets*

1mm x 4.7mm Shred Size - Level 6

Automatic EvenFlow Lubricator

SmartPower Management

Made in Germany

Built in EvenFlow Lubrication System evenly lubricates the cutting cylinders reducing the risk of a paper jam.

The easy-to-use command dial controls all of the shredder's functions such as power up, reverse, and continuous run.
