

DAHLE CLEANTEC® SHREDDER

SMALL OFFICE SERIES

41214

- 9 1/2" Feed Opening
- 9/11 Sheet Capacity
- 1/8" x 1 1/16" Shred Size - Level 3
- CleanTEC® Filtration
- Safe Technology
- SmartPower Management
- EvenFlow Lubricator

Improving air quality in the office is the basic foundation of the CleanTEC® design. This integrated air filtration system collects fine dust where it is created, directly above the cutting cylinders. The dust is then pulled through a closed system into a specialized CleanTEC® filter on the back of the machine. This filter permanently traps up to 98% of the fine dust, and provides a cleaner, healthier work environment.

Safety continues to be the priority at Dahle, and the CleanTEC® 41214 shredder features the most advanced safety features in the industry. Equipped with the revolutionary Safe Technology Package, each shredder offers Verbal and Contact Emergency Shutdown. In the event of an emergency, simply say "Stop" or tap the top cover of the machine, and the shredder immediately stops. The 9 1/2" feed opening is reinforced with steel and only large enough to accept paper. As an added safeguard, this opening contains electronic sensors that will turn the shredder off, should your fingers get too close. An emergency shutoff switch is also located on the back of the machine as yet another level of personal safety.

The easy-to-use command dial controls all of the machine's functions and notifies the user when sheet capacity is exceeded, when to replace the filter, and even when to change the shred bag. Equipped with ESP (Electronic Sensing Protection), the shredder "Knows" how much paper you're trying to shred and won't allow sheet capacity to be exceeded.

The CleanTEC® 41214 operates using the intuitive SmartPower Energy Management System. This multi-stage system reduces power consumption after ten minutes of sitting idle (sleep mode), and completely powers down after 30 minutes of inactivity. Dahle SmartPower will appeal to those interested in conserving energy as well as reducing electrical costs.

Small offices or teams of employees will benefit from the ease of use and quiet operation of this small to mid-size shredder. The CleanTEC® 41214 shredder is designed to shred between 100 and 400 sheets of paper per day, and is perfect for destroying personnel records, client proposals and tax information.

The CleanTEC® filter traps up to 98% of the fine dust, and provides a cleaner, healthier work environment.

The easy-to-use command dial controls all of the shredder's functions and illuminates the proximity to sheet capacity.
